To Whom It May Concern,

Letter of Assessment

From 26-Aug-2024 to 29-Nov-2024, pursuant to our agreement with Atlassian Pty Ltd (Atlassian), elttam conducted a review of the Atlassian Confluence Cloud web application and its mobile application versions, prioritising the following:

- Confluence Cloud Databases
- Confluence Cloud Whiteboards
- Custom Domains
- Loom integration
- Live-edit pages
- End user automation (Smart Buttons)
- pdf-exports
- Space and site imports

A dedicated team of four experienced security consultants conducted the security assessment over the specified period. The testing team had access to internal documentation, development guides, relevant repositories and got support from engineers. The assessment methodology used a code-assisted (white-box) approach and both automated and manual penetration testing techniques were used.

A final report, detailing technical issues and offering remediation advice, was then provided to Atlassian Pty Ltd.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government, and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our clients secure their most important assets.

Sincerely,

Matt Jones
Director
