To Whom It May Concern,

Letter of Assessment

From 23-May-2024 to 12-Jun-2024, pursuant to our agreement with Atlassian Pty Ltd (Atlassian), elttam conducted a review of Atlassian Guard, formerly Atlassian Access, a cloud product and user management and security policy suite to manage organisations across Atlassian Cloud tools.

The engagement with Atlassian began with a briefing and walk-through. Subsequently, a dedicated team of two experienced security consultants conducted the security assessment over the specified period. The testing team had access to internal documentation, development guides, relevant repositories and got support from engineers.

The assessment methodology used a white-box approach, including both automatic and manual techniques, with the scope of the testing focused on risks at the application and API layer to identify vulnerabilities in design and implementation. A final report, detailing technical issues and offering remediation advice, was then provided to Atlassian Pty Ltd.

elttam is an independent security company providing research-driven security assessment services to the Fortune 500, global financial institutions, leading technology companies, Australian Federal Government, and up and coming technology start-ups. We combine pragmatism and deep technical insight to help our clients secure their most important assets.

Sincerely,

Matt Jones
Director
